

New Source Review newspaper advertisements for construction permit applications, September 29, 2011. The following public notices have been published in the newspapers listed below each advertisement. These newspaper advertisements for construction permit applications were published on one of the following dates: September 27, September 28, or September 29, 2011. Public notices are generally published every two weeks. The previous publication of public notices was September 15, 2011.

### PUBLIC NOTICE

The Tennessee Division of Air Pollution Control (TDAPC) has received requests for construction and/or modification of air contaminant sources as noted below. The proposed construction and/or modification is subject to part 1200-3-9-.01(1)(h) of the Tennessee Air Pollution Control Regulations, which requires a public notification and 30-day public comment period. Interested parties may express their comments and concerns in writing to Mr. Barry R. Stephens, Director, Division of Air Pollution Control, 9<sup>th</sup> Floor, L & C Annex, 401 Church Street, Nashville, Tennessee 37243-1531 within thirty (30) days of the date of this notice. Questions concerning a source may be addressed to the assigned Division personnel at the same address or by calling 615-532-0554.

Individuals with disabilities who wish to participate should contact the Tennessee Department of Environment and Conservation to discuss any auxiliary aids or services needed to facilitate such participation. Such contact may be in person, by writing, telephone, or other means, and should be made no less than ten days prior to the end of the public comment period to allow time to provide such aid or services. Contact the Tennessee Department of Environment and Conservation ADA Coordinator, 12th Floor, 401 Church Street, Nashville, TN 37243, 1-866-253-5827. Hearing impaired callers may use the Tennessee Relay Service, 1-(800)-848-0298.

The applicant is Stones River Quarry, LLC with a mailing address of 1219 Whitehall Road, Murfreesboro, TN 37130. They seek to obtain an air contaminant permit (Division identification number 08-0049-01/64951) for construction of a Rock Crushing Operation located at 962 Bradyville Road, 4 miles west of Woodbury, TN 37190. This proposed operation consists of crushers, conveyors, screens, and associated equipment used to produce crushed limestone aggregate. Wet suppression is used for pollution control. There would be physical construction. Regulated air contaminants are emitted by this source. Mr. Robert Benjamin is the assigned Division person.

For the Cannon County "Cannon Courier" - published once on or before Thursday, September 29, 2011.

---

The applicant is Carters Pet Crematory with a mailing address of P. O. Box 190, Huntingdon, TN 38344. They seek to obtain an air contaminant permit (Division identification number: 09-0123-01/64750) for construction of a Pet Crematory located at 19480 Hwy 22, McKenzie, TN 38201. This proposed operation would consist of an incinerator unit and associated equipment for incinerating animal remains. Natural Gas would be used as fuel. An afterburner would be used for pollution control. There would be physical construction. Regulated air contaminants would be emitted by this source. Mrs. Sarosh Kaiser is the assigned Division person.

For the "Carroll County News-Leader" -- published once on or before Thursday, September 29, 2011.

---

The applicant is Hickory Specialties dba Kerry Ingredients and Flavours with a mailing address of 13797 Highway 70 North, Monterey, TN 38574. They seek to obtain air contaminant permits for modification of various sources located at the same address as follows:

(1) Three Calciners (Division identification number: 18-0028-04/64930). This existing operation consists of three calciners and associated equipment used to produce liquid smoke and charred sawdust. Three afterburners and three packed absorption towers are used for pollution control. The requested modification is to remove the

operating hours limitation from the permit. There would be no physical construction. Regulated air contaminants emitted by this source would increase. Mr. M. Reynolds is the assigned Division person.

(2) Sawdust Dryer (Division identification number: 18-0028-11/64930). This existing operation consists of a direct-heated rotary dryer and associated equipment used to remove moisture from sawdust. Two mechanical collectors are used for pollution control. The requested modification is to remove the operating hours limitation from the permit. There would be no physical construction. Regulated air contaminants emitted by this source would increase. Mr. M. Reynolds is the assigned Division person.

(3) Two Evaporators (Division identification number: 18-0028-18/64930 and 18-0028-19/64930). This existing operation consists of two evaporators, a boiler, water heater, and associated equipment used to evaporate and condense liquid smoke. Because of the amount and type of emissions, the use of pollution control equipment is not proposed. The requested modification is to remove the operating hours limitation from the permit. There would be no physical construction. Regulated air contaminants emitted by this source would increase. Mr. M. Reynolds is the assigned Division person.

For the Cumberland County "Crossville Chronicle"--published once on or before Thursday, September 29, 2011.

---

The applicant is K. W. Lankford Excavating with a mailing address of 1055 East Rail Street, Dickson, TN 37055. They seek to obtain air contaminant permits for a Portable Limestone Rock Crushing Operation located in the area of 152 Lime Kiln Road. Multiple operations are as follows:

- (1) Rock Crushing Operation (Division identification number: 22-0166-05/64894). This proposed operation would consist of crushed rock, limestone stockpiles, conveyors, portable powered screening equipment and associated equipment used to crush stone. Wet suppression would be used for pollution control. There would be physical construction. Regulated air contaminants would be emitted by this source.
- (2) Generator (Division identification number: 22-0166-06/64895). This proposed operation would consist of one (1) portable diesel-fired internal combustion engine (510 hp) and associated equipment used to produce power. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. W. Collins is the assigned Division person.
- (3) Generator (Division identification number: 22-0166-07/64896). This proposed operation would consist of one (1) portable diesel-fired internal combustion engine (215 hp) and associated equipment used to produce power. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. W. Collins is the assigned Division person.

For the Dickson County "The Dickson Herald"--published once on or before Thursday, September 29, 2011.

---

The applicant is American Creative Solutions with a mailing address of 435 East Main St., Savannah, Tennessee 38372. They seek to obtain air contaminant permits (Division identification numbers: 36-0115-01, 02, 03 / 64771, 2, 3) for a surface coating and woodworking operation at the same address. The proposed construction would consist of a paint room, adhesive spray booth, a table saw, and a router. There would be physical construction. Regulated air contaminants would be emitted by this source. Exhaust filters would be used for pollution control in the paint room. Mr. Thomas Krinov is the assigned Division person.

For the "Hardin County Courier"-- published once on or before Thursday, September 29, 2011.

---

The applicant is Teknor Apex-Haywood Company with a mailing address of 751 Dupree Ave, Brownsville, TN 38012. They seek to obtain an air contaminant permit (Division identification number: 38-0039-04/64912) for construction of a Boiler at the same address. This proposed operation would consist of a natural gas fired boiler and associated equipment used to produce steam. Because of the amount and type of emissions, the use of pollution control equipment is not proposed. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. J. Fuss is the assigned Division person.

For the Haywood County "States Graphic"--published once on or before Thursday, September 29, 2011.

---

The applicant is Packaging Corporation of America with a mailing address of 112 Edwards Drive, Jackson, Tennessee 38301. They seek to obtain air contaminant permit(s) (Division identification number(s): 57-0133-03/64886P for removal of (254) Ward 66"x80" 2-color RDC and installation of (254)Ward 66"x113" 3 -color RDC with Exhaust Filter used as Controls at the facility. The facility is located on 112 Edwards Drive, Jackson, Tennessee 38301. The requested operation is for the approval to emit regulated air pollutants. Mr. Jim A. Attar is the assigned Division person.

For the Madison County "Jackson Sun-Daily"--published once on or before Thursday September 29, 2011.

---

The applicant is Nat Hira, Inc. dba Echo Valley Market with a mailing address of 2465 West Broad Street, Cookeville, TN 38501. They seek to obtain an air contaminant permit (Division identification number: 71-0330-01/64051) for an existing Gasoline Dispensing Facility at the same address. This existing operation consists of three (3) underground tanks and thirteen (13) gasoline dispensing nozzles. Stage I vapor recovery is used for gasoline emission control. There would be no physical construction. Regulated air contaminants are emitted by this source. Mr. M. Reynolds is the assigned Division person.

For the Putnam County "Cookeville Herald-Citizen"-- published once on or before Thursday, September 29, 2011.

---

The applicant is CNX Gas with a mailing address of 105 Mitchell Road, Suite 104, Oak Ridge, TN 37830. They seek to obtain air contaminant permits (Division identification number: 76-0100-01/64890) for construction of a Natural Gas Processing Operation approximately 10 miles southeast of Fairview, TN on Smokey Creek. This proposed operation would consist of a nitrogen rejection unit to extract nitrogen from natural gas, a natural gas-fired compressor driver, and a natural gas-fired electrical generator. A catalytic convertor would be used to control emissions from the natural gas-fired compressor driver. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. T. Blake is the assigned Division person.
